million

Assessment of Prevention, Diagnosis, and Treatment Options

Projects address critical decisions that patients, their caregivers and clinicians face with too little information.

- 24 projects
- 14.9% of responsive applications
- Average Award Budget: $1,903,298
- Total Amount Awarded: $45,679,145

Improving Healthcare Systems

Projects address critical decisions that face health care systems, the patients and caregivers who rely on them, and the clinicians who work within them.

- 13 projects
- 12.3% of responsive applications
- Average Award Budget: $1,886,387
- Total Amount Awarded: $24,523,025

Communication and Dissemination Research

Projects address critical elements in the communication and dissemination process among patients, their caregivers and clinicians.

- 6 projects
- 6.5% of responsive applications
- Average Award Budget: $1,823,106
- Total Amount Awarded: $10,938,633

Addressing Disparities

Projects will inform the choice of strategies to eliminate disparities.

- 9 projects
- 18% of responsive applications
- Average Award Budget: $1,672,033
- Total Amount Awarded: $15,048,300

Accelerating Patient-Centered Outcomes Research and Methodological Research

Projects will inform future iterations of PCORI's methodology report and its standards.

- 19 projects
- 13.8% of responsive applications
- Average Award Budget: $949,789
- Total Amount Awarded: $18,045,991
