The Cholangiocarcinoma Foundation 3rd Annual Conference
February 3-5, 2015 in Salt Lake City, Utah

This annual program seeks to develop sustainable participation of the medical and research communities in the field of cholangiocarcinoma by providing a forum to:

- Increase the knowledge of attendees about key issues central to the prevention, diagnosis, treatment, and cure for cholangiocarcinoma
- Present a diversity of perspectives focused on clinical, basic, and translational research
- Stimulate multi-disciplinary, cross-institutional collaborations
- Foster dialogue and inspire innovation

Further, because patients living with cholangiocarcinoma have a direct stake in their own medical care and are in a unique position to provide input, CCF has expanded its Annual Conference to include programming that addresses questions and concerns that are important to patients and their families. Patients and caregivers—having experienced the disease firsthand—will be invited to learn about cholangiocarcinoma, share their personal experiences, and contribute to future efforts to further cholangiocarcinoma research.

Who Should Attend:
- Researchers
- Physicians
- Oncologists
- Radiologists
- Surgeons
- Gastroenterologists
- Hepatologists
- Nurses specializing in oncology, intensive care, and palliative care
- Pharmaceutical Companies
- Government Regulators
- Policymakers
- Patients, Caregivers and others invested in the field of cholangiocarcinoma

Patient and Caregiver Sessions
- FEB 3

Basic, Translational and Clinical Research Sessions
- FEB 4
- FEB 5
