

CIMPOD Conference

Causal Inference Methods for PCOR using Observational Data

February 25-26, 2016 Washington D.C.

REGISTER TODAY AT:
WWW.CIMPOD2016.ORG

This work is supported through a Patient-Centered Outcomes Research Institute (PCORI) Engagement Award (865-MTPPI)

Introducing CIMPOD 2016

The CIMPOD Conference is unique in its singular focus on choosing wisely among various causal inference techniques to address Patient Centered Outcomes Research (PCOR) questions using observational data.

In addition to Statisticians and Epidemiologists, we invite Healthcare System Researchers, Clinical Researchers, Patient Advocates and other Stakeholders to attend this 2-day conference located in our nation's capital. The conference will consist of expert presentations, panel discussions, and hands-on workshops that will provide valuable insight and practical skills to all attendees and conference participants. Leading causal modeling experts will present and lead the workshops.

““This conference is specifically designed to help researchers and clinicians learn how to select and use causal modeling techniques to conduct comparative health studies using electronic health records or claims data.” – Dr. Yi Zhang, CIMPOD Conference Organizer

Why Attend CIMPOD 2016?

- In-depth, open discussions on principles for choosing appropriate methods to answer PCOR questions using real-world data
- Opportunity for new researchers to interact with the foremost experts in the field of CI methods
- Participate in the exchange of ideas and network with participants from various disciplines

- Attendees will leave the conference equipped with the tools needed to produce high-quality research that addresses analytical concerns related to confounding and bias

Confirmed Speakers:

- Michael Baiocchi, Stanford Univ.
- Heejung Bang, UC Davis
- Miguel Hernan, HSPH, Harvard
- Joseph Hogan, Brown University
- Jay Kaufman, McGill University
- Maya Petersen, UC Berkeley
- Dylan Small, Univ. of Pennsylvania
- Jessica Young, HSPH, Harvard

With more speakers and presenters to follow
