Cycle 2 2018 Funding Cycle
Application Guidelines for Medication-Assisted Treatment (MAT) Delivery for Pregnant Women with Substance Use Disorders Involving Prescription Opioids and/or Heroin PCORI Funding Announcement

Published June 1, 2018

These guidelines apply to the Cycle 2 2018 Medication-Assisted Treatment (MAT) Delivery for Pregnant Women with Substance Use Disorders Involving Prescription Opioids and/or Heroin PCORI Funding Announcement (PFA). Funding announcements, templates, and other resources are available at http://www.pcori.org/funding-opportunities. The Cycle 2 2018 Funding Cycle closes September 25, 2018, at 5 p.m. (ET).
About PCORI

The Patient-Centered Outcomes Research Institute (PCORI) is committed to transparency and a rigorous stakeholder-driven process that emphasizes patient engagement. PCORI uses a variety of forums and public comment periods to obtain public input to enhance its work. PCORI helps people make informed healthcare decisions and improves healthcare delivery and outcomes by producing and promoting high-integrity, evidence-based information that comes from research guided by patients and other stakeholders.

PCORI was authorized by Congress in 2010 as a nonprofit, nongovernmental organization. PCORI’s purpose, as defined by our authorizing legislation, is to help patients, caregivers, clinicians, policy makers, and other healthcare system stakeholders make better-informed health decisions by “advancing the quality and relevance of evidence about how to prevent, diagnose, treat, monitor, and manage diseases, disorders, and other health conditions.”

What Has Changed for the Cycle 2 2018 Funding Cycle PCORI-Wide

- Under the Budget tab in PCORI Online, applicants will enter detailed budget for each project year for prime contractors only. The Federally Negotiated or Independently Audited Indirect Cost Rate letter (prime contractor) and the Fringe Benefit Rate Policy Verification Document (prime contractor) will be combined and uploaded with the Budget Justification Template.
- Applicants are required to complete the (updated) PCORI Methodology Standards Checklist and upload it as a single PDF with the Research Plan Template to PCORI Online.
  - Applicants must adhere to the updated Methodology Standards, which now include 54 standards in 13 categories—see pages 20-21 for more information
- The Research Plan Template has been updated:
  - Refer to PFA-specific LOI and Research Plan templates for page limits.
  - Research Strategy questions have been updated.
- The peer review budget is no longer a firm fixed amount.
I. About These Guidelines

This document provides key information to help researchers prepare for and respond to the Cycle 2 2018 Medication-Assisted Treatment Delivery for Pregnant Women with Substance Use Disorders Involving Prescription Opioids and/or Heroin PCORI Funding Announcement (PFA).

These guidelines should answer many questions applicants might have, but the following resources are also available:

- PCORI’s Applicant FAQs¹ cover common questions about PCORI and the application process.
- PCORI’s Help Center² provides additional applicant resources.
- **For Programmatic Inquiries:** Contact the PCORI Helpdesk via email (sciencequestions@pcori.org), phone (202-627-1884), or online (http://www.pcori.org/PFA/inquiry). PCORI will provide a response within two business days. However, we cannot guarantee that all questions will be addressed two business days before a Letter of Intent (LOI) or application deadline.
- **For Administrative, Financial, or Technical Inquiries:** Contact the PCORI Helpdesk at pfa@pcori.org. PCORI will provide a response within two business days. Note that during the week of the application deadline, response times may exceed two business days. Applicants may also call the PCORI Helpdesk (202-627-1885).

It is the applicant’s responsibility to submit the application on or before the deadline. Refer to PCORI’s Policy on Submission of Research Contract Applications.³

Administrative Considerations

To ensure a thorough and competitive review process, PCORI strictly enforces the formatting and administrative compliance guidelines outlined in the PFA, FAQs, and Application Guidelines. Applicants who fail to submit the required documents may be rejected from the merit review process.

All rejection decisions made by the Contracts Management department are final. Email pfa@pcori.org with any formatting or administrative compliance questions to ensure that your LOI or application will not be deemed noncompliant once submitted to PCORI. See Appendix 3: Administrative Actions.

Unless otherwise stated within the Application Guidelines, all materials submitted on behalf of an applicant organization are the property of that organization. PCORI will not share or publicize the contents of an organization’s application.

Funding Mechanism

PCORI utilizes a contract mechanism, not grant, for its awards. PCORI funds projects that demonstrate the highest probability of being completed on time and within budget, and meeting all milestones and

---

¹ Available at http://www.pcori.org/content/faqs-applicants/.
² Available at http://help.pcori.org/hc/en-us/.
³ Available at http://www.pcori.org/funding-opportunities/how-apply/policy-submission-research-contract-applications/.
deliverables. **Applicants must submit representative budgets and Research Plans that allow the project to conclude within the approved contract term.**

As part of its active portfolio management, PCORI provides contractual and programmatic monitoring throughout the contract term period. Applicant Institutions and the Administrative Officials are advised to carefully review PCORI’s standard Contract templates provided on the Awardee Resources page on PCORI website. Note that international awardees will be issued a contract in U.S. dollars. Fluctuations in currency exchange rates will have no bearing on the contract value, nor will adjustments be made to accommodate losses or gains associated with such currency fluctuations.

II. Who Can Apply

Applications may be submitted by any private-sector research organization, including any nonprofit or for-profit organization; any public-sector research organization, including any university or college hospital or healthcare system; any laboratory or manufacturer; or any unit of local, state, or federal government. The Internal Revenue Service must recognize all U.S. applicant organizations. Nondomestic components of organizations based in the United States and foreign organizations may apply, as long as there is demonstrable benefit to the U.S. healthcare system and U.S. efforts in the area of patient-centered research can be shown clearly. Organizations may submit multiple funding applications. Individuals are not permitted to apply. If you have questions about eligibility, contact pfa@pcori.org.

**Note:** A Principal Investigator (PI) can only submit one LOI per PFA. However, an individual listed as a PI on one LOI may be listed as and serve in another role (e.g., co-PI, co-investigator, or consultant) on other LOIs within the same PFA during the same cycle. A PI may submit multiple LOIs to different program PFAs in a cycle, but the PI must ensure that the research topics and projects are not similar. If a PI submits an LOI to multiple program PFAs, LOIs that exhibit scientific overlap or that appear to be duplicate submissions will be disqualified. PCORI will contact the PI and provide him or her with an opportunity to choose which PFA he or she would like to apply to. This applies to single- and dual-PI submissions.

III. How to Apply

To submit an LOI and application (if invited), including all required documents, follow the instructions provided in these guidelines and in PCORI Online. All documents must be submitted through PCORI Online. Refer to the specific PFA for more information regarding the review process of LOIs and applications.

To submit an application or to register your organization in PCORI Online, you need a Data Universal Numbering System (DUNS) number and an Employer Identification Number (EIN). You can apply for a DUNS number and an EIN, if applicable.

---

5 Available at https://pcori.force.com/engagement.
6 Available at https://www.test.grants.gov/applicants/organization-registration/step-1-obtain-duns-number.html
7 Available at https://www.irs.gov/businesses/small-businesses-self-employed/apply-for-an-employer-identification-number-ein-online
Step 1: Register

To apply for PCORI funding, an applicant (PI or PI designee) must register in PCORI Online. To register, you must provide a name, an email address, a password, and a security question. Once signed in, you will be directed to the home screen. Click on the Research Awards tile to apply for funding. PCORI strongly recommends that only the PI create the LOI/application record, because whoever creates the record will have permanent access to it in PCORI Online.

Step 2: Submit a Letter of Intent

An LOI is required for new and resubmitted applications. Download the PFA-specific LOI Template from the PCORI Funding Opportunities webpage. For formatting instructions, reference Step 4.

To submit an LOI, go into PCORI Online, complete the required fields, and upload the completed PFA-specific LOI into the system. For detailed instructions on how to navigate the system, reference the PCORI Online: Pre-Award User Guide for Research Awards.  

Step 3: Initiate Application Process

Applicants will be notified by the date specified within the PFA as to whether or not they have been invited to submit an application.

The application process consists of multiple sections within PCORI Online, all of which must be completed before submission. Log in to PCORI Online to view the full list of questions.

Step 4: Format and Complete Required Documents

Required templates are available on the PCORI Funding Opportunities webpage. Find the PFA to which you are applying and download the correct PFA-specific templates, because they vary among PFAs and cycles. Keep the following in mind:

- Do not reorganize sections within the templates.
- Do not alter the templates' main header questions within your submission.
- You may delete instructional text.

All required documents must be formatted as follows:

---

8 Available at http://www.pcori.org/sites/default/files/PCORI-Online-Pre-Award-User-Guide.pdf.
9 Available at http://www.pcori.org/funding-opportunities/.
• **Header:** Include the PI’s full name in the top-left corner of every page.

• **Font:** Use Calibri size 11. Figures, tables, and captions may be size 8 font.

• **Spacing:** Use single spacing.

• **Margins:** Use at least half-inch margins. The header may fall within the top margin, but the body text may not begin closer than a half-inch from the edge of the page.

• **Page Numbers:** Each page must be numbered consecutively for each PDF upload. Each section of an uploaded document must begin with page 1.

• **Page Limit:** This varies based on document.

• **File Name Format:** Refer to Application Checklist.

• **References:** PCORI suggests including all references as in-text citations using American Medical Association (AMA) citation style, but other citation styles are accepted.

**Step 5: Upload Required Documents**

Follow the Application Checklist included in these guidelines to enter required information. Upload required documents to PCORI Online in the correct order. When instructed, use Adobe Acrobat Professional\(^\text{10}\) to combine documents into a single PDF file for upload. Within the Templates & Uploads tab, click “Choose file” to select a file from your computer, and click “Upload.” For detailed instructions, refer to the Templates & Uploads section of the [PCORI Online: Pre-Award User Guide for Research Awards](#).

**Step 6: Submit for Authorization**

Once all required information has been completed and uploaded, select “Review & Submit” and then “Submit” to forward the application to your Administrative Official (AO) to authorize and submit. The AO must approve and submit the final application for official submission to PCORI before the deadline. **PCORI Online will email the AO, but the PI should notify the AO when the application is ready for review, AO approval, and submission.** The PI and the AO may not be the same individual. Both the AO and the PI will receive an email confirming that PCORI has received the application.

**IV. When to Apply**

Deadlines for each funding cycle are noted in the PCORI Funding Opportunities and in the PFA. System or technical issues with PCORI Online that affect the on-time submission of an application must be reported to PCORI before the specified deadline. Problems with computer systems at the applicant’s place of work must be reported to PCORI before the deadline.

\(^{10}\) See adobe.com for more information on Adobe Acrobat Professional.
organization or failure to follow instructions in PCORI Online, PCORI Application Guidelines, or PFAs are not valid issues warranting consideration of a deadline extension. See PCORI’s Policy on Submission of Research Contract Applications\textsuperscript{11} for complete information.

V. What to Include

\textbf{Note}: Only applicants selected to submit an application may begin the application process. You will be notified by the date outlined in the PFA as to whether or not you have been invited to submit an application.

Applicants are encouraged to review this entire section. Print and complete the provided Application Checklist to ensure that the LOI and application are submitted correctly. Download all required templates from the PCORI Funding Opportunities\textsuperscript{12} webpage.

\textsuperscript{11} Available at \url{http://www.pcori.org/funding-opportunities/how-apply/policy-submission-research-contract-applications/}.

\textsuperscript{12} Available at \url{http://www.pcori.org/funding-opportunities/}.

Letter of Intent

An LOI must be submitted before you complete your application. Enter the information in the required fields in PCORI Online.

Upon receipt of LOIs, PCORI program staff will review them for programmatic fit and potential overlap with existing projects in the portfolio. An applicant whose LOI does not meet program areas of interest or whose LOI substantially overlaps with existing projects in the portfolio will not be invited to submit an application. Applicants will receive an email notification accepting or declining their LOI, as specified in the PFA.

Resubmission Policy

An applicant may resubmit an application that was not funded and that completed PCORI’s merit review process (i.e., the applicant received a summary statement). PCORI does not limit the number of times an applicant may resubmit.

If a full application was deemed nonresponsive and did not progress through the full merit review process, it is considered a new submission and requires submission of an LOI. Submitting the same application to a different program’s PFA is also considered a new submission. Each program’s PFA has different requirements; therefore, applicants should carefully review the program-specific PFA to which they are applying.

Submitting an LOI is also a requirement of resubmissions.

PI and Contact Information

PCORI refers to three specific roles with particular responsibilities. Keep the following in mind as you complete this section:

Principal Investigator (PI)

Description

• If electing to submit an application with two PIs, one PI must be designated as the Contact PI. The Contact PI is responsible for submitting the application and will serve as PCORI’s primary point of contact for all communication. **No more than two PIs can be named on an application.**

• The PI(s) is responsible for the project’s engagement, scientific or technical aspects, as well as the project’s peer-review-related activities.

• The Contact PI’s institution must be the primary institution for the award.

• PIs can participate in other applications (from the same or another organization) in the same or a different role, such as co-PI, dual-PI, co-investigator, or consultant. Refer to the [Who Can Apply](#) section for specific instructions.

Activities
• The PI(s) assume(s) responsibility and accountability for research execution, compliance, and organization conduct.

• The Contact PI is responsible for submitting the application, submitting all progress reports, and serving as PCORI’s programmatic and administrative contact. All PCORI communication will be sent to the Contact PI, and it is his or her responsibility to share PCORI communications with PI #2.

• The PI(s) manage(s) day-to-day operations of the project.

• The PI(s) act(s) as the organization’s lead research representative.

**Administrative Official (AO)**

**Description**

• The AO is responsible for matters related to the award and administration of the contract.

• The AO cannot be the PI.

• The AO’s signature certifies that the organization will be accountable for appropriately using the funds awarded and for performing the PCORI-supported project.

**Activities**

• The AO manages contract activation, modifications, and additional required administrative matters.

• The AO certifies contract compliance of all applicable assurances and certifications referenced in the application.

**Financial Official (FO)**

**Description**

• The FO is responsible for all required financial reporting.

**Activities**

• The FO completes and certifies expenditure reports on behalf of the organization.

• The FO accounts for contract funds and submits invoices and payment details.

**Key Personnel**

PCORI identifies as key personnel any individual who is critical to the project’s scientific development and execution in a measurable way and whose absence from the project would affect the likelihood of success.

Note the following:

• Applications can include up to two PIs.

• PIs can serve in other roles (e.g., dual-PI, co-PI, co-investigator, or consultant) on other
applications.

- If applicable, applicants must explain the rationale for including two PIs in the Leadership Plan Template.

- Consultants and personnel from collaborating organizations may be included as key personnel if they meet the definition. See the PCORI’s Glossary for “Consultant” and “Subcontractor” definitions.

- Project Directors, or equivalent, are considered key personnel.

- Applicants are required to identify any patient and other stakeholder partners, whether individuals or organizations, that will assist in conducting the project. If your project is funded, these partners will be named on the PCORI website along with the PI and the recipient organization. They may also be recognized in other PCORI communications, such as press releases, or mentioned in response to requests for information. While not required at the time you submit your application, if you already have patient or other stakeholder partners, whether individuals or organizations, these names must be provided to PCORI in your application. By providing the names of the partnering individuals and organizations, you acknowledge that you have obtained any required permission or consent from the respective partners to disclose their names to PCORI and to permit PCORI to make their names publicly available. If a patient or other stakeholder partner wishes to remain anonymous, please contact us at pfa@pcori.org for additional guidance on how to recognize such partners appropriately.

- Post-merit review, PCORI may request current, pending, and other support documentation from all key personnel. This material must be submitted prior to award.

- If awarded, the addition or replacement of key personnel listed in the submitted application requires PCORI’s approval during contract negotiation and post-contract execution.

PFA-Specific LOI Template

Download and complete the PFA-specific LOI Template from the PCORI Funding Opportunities webpage. Do not include supplemental materials (e.g., supporting journal articles and Letters of Support) or additional information not requested in the template. Replace the questions on the template with your responses, but retain the question numbers. **Note that any additional template modifications will result in the disqualification of your LOI.**

LOIs are competitive and will be screened by PCORI staff. The information included in this template will be used as the primary source of information for the screening process. Focus on including only critical information because space is limited. Provide a description that allows the scientific community to understand the project, including the aims and study design, without reviewing the full application. References are not included within the three-page limit. PCORI suggests including all references as in-text citations using AMA citation style, but other citation styles are accepted. *(Note: All LOI Templates must follow the formatting guidelines provided in Step 4.)*

Note the following:
• Aside from removal of the questions under each section header, no other modifications may be made to the template; any modifications will result in administrative withdrawal of the LOI.

• Do not include figures or general tables. Tables can only be included for power calculations.

• Do not upload supplemental materials, such as supporting journal articles and Letters of Support, or additional documents as part of your LOI because they are not requested at this stage. Their inclusion will result in LOI rejection without review.

• Be sure to delete the template cover page before submitting an LOI. To submit an LOI, save the completed PFA-specific LOI as a PDF. Label your LOI file using the following nomenclature: “PI LastName_(five digit LOI number)_LOI.pdf.” An LOI number will be generated automatically and will be visible at the top of the web page in PCORI Online once the LOI has been saved. Click “Review & Submit” to review your submission and then click “Submit.” Navigate back to the LOI and Application dashboard in PCORI Online where you can see your LOI number and track your status. Once your LOI is submitted, you cannot edit it.

• For the Budget Justification on direct costs, an answer such as “will not exceed $4 million” will be deemed nonresponsive because it lacks justification.

LOIs are qualitatively evaluated based on the following criteria:

• Sufficient size and scope to create a significant impact on patient outcomes and/or healthcare practices

• Clarity and credibility of applicants’ responses to the LOI questions, including the rationale for the estimated sample size, citing published estimates that include effect sizes and standard deviations and explaining whether the sample size is sufficiently large to permit a valid and rigorous comparative analysis of important subgroups

• Prior relevant experience

• Programmatic fit and balance, taking into consideration whether the proposed study significantly overlaps with previously funded studies or concurrent applications or, conversely, whether the application fills a gap in the portfolio of proposals with certain characteristics, including disease category, priority population, and methodologies.

Note: LOIs are not assigned scores.

For those rare circumstances in which the estimated total costs exceed the targeted funding announcement’s specific limit, provide a detailed justification in the LOI that ties the extra expense to the project’s success. Note that any request for a project period longer than the number of years stated in stated in each PFA will be denied.

**Application Requirements**

The following sections are applicable only if you have been invited to submit an application.

You are invited to submit an application based on the information provided in the LOI. Any changes to the following require PCORI’s approval:
• PI (Contact PI and PI #2)
• Institution
• Study design
• Research question(s)
• Specific aims
• Comparators
• Total budget requested

If you need to change any of this information or have any questions, email pfa@pcori.org.

**PI and Contact Information**

Review information transferred from your LOI, and update as needed.

**Project Information**

Enter the following information directly into PCORI Online.

**Technical Abstract**

Provide a technical abstract in PCORI Online that summarizes your Research Strategy. The abstract must include the following sections:

- **Background and Significance:** State the problem or question the research is designed to address.
- **Study Aims:** Briefly describe the specific aims of the study, including specific research questions and long-term objectives.
- **Study Description:** Provide a detailed description of the study design. Include, as applicable:
  - Overall study design
  - Main components of the intervention and comparator(s)
  - Study population (source, inclusion criteria, demographic information, clinical status, and target sample size by arm)
  - Primary and secondary outcomes
  - Analytic methods

**Public Abstract**

Provide a description of your project, written in lay language that the general public will understand. Include the following:

- Description of the problem your project seeks to solve
• Outcomes you hope to achieve
• Brief background on why this project is important to patients
• Explanation of how patients and other stakeholder partners will help to make the project successful

This summary should be comprehensible to a variety of audiences and will be reviewed by scientists, patients, and stakeholders during the merit review process. Public abstracts from applications that are awarded a contract will be posted on PCORI’s website. The names of the individuals and organizations that comprise the research team, including patient and stakeholder partners, will also be posted on PCORI’s website, as described in the Key Personnel section above.

**Milestones**

Complete all required sections in the Milestones/Deliverables tab in PCORI Online. Milestones are concrete, specific events or accomplishments that are documented by deliverables. They include only the activities that the PCORI contract supports. Examples of milestones include minutes of major meetings of the research partners (scientists and patient/stakeholder representatives), recruitment of patients or research subjects, survey development, inception of the intervention, and establishment of databases. See [Appendix 1: Example Milestones](#) for a more complete list. If applicable, milestones may also include activities dedicated specifically to engagement, such as the recruitment of all patient/stakeholder research partners or results of annual surveys of patient/stakeholder partners. As part of Merit Review Criterion 3, Scientific Merit (research design, analysis, and outcomes), reviewers evaluate the submitted milestone schedule to assess the feasibility of the study plan.

Interim and final deliverables will be included in your research contract if your application is funded. Note that PCORI reserves the right to request additional deliverables during the life of the project.

Examples of deliverables that may be required following contract execution include but are not limited to, the following:

- PCORI Progress Reports
- Study Protocol
- Copies of Institutional Review Board (IRB) approval
- Registration of the trial on [ClinicalTrials.gov](https://ClinicalTrials.gov)
- Data Safety and Monitoring Plan
- Recruitment Plan
- Engagement Plan
- Scientific abstracts accepted or presentations made
- Scientific manuscripts accepted for publication
- Copies of drafts of instruments, data dictionaries, educational materials, manuals, or other project deliverables
- Reports of plans to adopt research findings in practice
- Charts, tables, graphs, or other summaries of preliminary data
• Other documents or materials, as appropriate

**Note:** Milestones entered into PCORI Online must include specific deliverables associated with a timeline and must include project objectives that will be accomplished at specific times during the proposed project.

### Budget

Complete all required sections in PCORI Online, including the Peer-Review Budget section, and upload the [Budget Justification Template](#) to PCORI Online as a single PDF. Do not upload separate budget files for subcontractors; instead, include all subcontractor budget files within the prime applicant’s budget information.

#### Detailed Research Project Budget for Each Year of the Research Project Period

For each program year, complete a Detailed Budget for the prime applicant proposed in your application. For example, if your study lasts two years, the prime applicant must complete a Detailed Budget for Year One and for Year Two.

You must enter all personnel information in the Project Personnel tab that correspond to that year in the Budget tab. The applicant may add additional rows for personnel as needed. Following the example of a two-year study, applicants may delete the unused Years Three through Five Detailed Budget tabs. However, applicants may not add additional years. Each PFA states the maximum project periods. Note the following:

**A. Personnel Costs**

- **Personnel Costs:** These include the base salary for each scientific and technical staff member, employee patient or stakeholder partner, or other personnel on your project who are or are not accounted for in Section B: Consultant Costs. Provide a clear distinction between individuals who are key personnel and those considered “other” personnel.

- **PCORI will reimburse personnel costs that are consistent with and do not exceed what the applicant would normally pay under its own policy. PCORI may request salary verification during the contract activation process. Such compensation may include salaries and fringe benefits. See Appendix 2: Allowable and Unallowable Costs for more information.**

- **Salaries include wages earned by an employee, and fringe benefits may include insurance and retirement plans. Provide documentation to support the fringe benefits with the Budget Justification.**

- **Level of Effort:** Personnel who contribute to a PCORI-funded research project must monitor their total percentage of effort across all of their active funding, so that it does not exceed 100 percent. Before submitting the application to PCORI, the AO must certify that individual personnel will not exceed 100 percent effort if funded. You must report effort by the percentage of time over the course of the project year. If you are not requesting salary support, use $0 for the base salary.
• All personnel who dedicate effort to the project must be listed on the Personnel Budget with their level of effort, even if they are not requesting salary support. List the base salary for each person in the Budget Justification and Detailed Budget. Describe the individual’s specific functions in the Budget Justification. Provide an explanation of how the role supports the project aims and note any overlap in job functions.

• Salary Cap: The PCORI base salary cap for personnel is $200,000 annualized per individual, per year, excluding fringe benefits. An individual who earns less than $200,000 must use his or her actual base salary to calculate personnel costs. An individual with a full-time employee base salary of more than $200,000 must use $200,000 as the base salary rate in determining the amount of salary and time to charge to the project.

• Fringe Benefits: These costs are calculated based on the institution’s own policy. In the Budget Justification upload, applicants must provide a verification of the fringe benefit rate policy for the prime organization.

**Note:** Personnel costs must account for the level of effort required to initiate and complete the mandated Peer-Review Process. See the [Detailed Peer-Review Budget for Peer-Review-Related Costs](#) section for additional instructions.

**B. Consultant Costs**

• Consultant costs apply to those individuals who are not employees of the applicant organization or under a subcontract agreement as members of the contracted staff.

• Payments to nonemployee patient and stakeholder representatives must be included in the budget as consultant costs.

• Provide the total cost of consultant(s), as well as name(s), expected number of hours, and hourly rate.

• Include the daily consultant fee, travel expenses, nature of the consulting effort, and the reasons that the proposed project requires consultants. Note any overlap in duties with personnel.

• Consultant costs must be reasonable and justified within the Budget Justification.

• Include Letters of Support from each consultant, verifying the work to be performed and how the negotiated rate was established. See the [Letters of Support](#) section for more detailed information.

**C. Supply Costs**

• Supplies must be directly allocable and allowable to the proposed project, and not be part of general or administrative use. Supplies are consumable items that are used on a regular basis or other tangible items that do not meet the definition of “equipment.” Include the category of supplies needed and the cost for each.

• Tangible items with per-unit costs of $5,000 or more are considered equipment and cannot
be accounted for under this category.

- Indicate general categories such as mailings, printing, lab, and equipment with less than $5,000 per-unit cost. Provide detailed explanations in the Budget Justification for all costs exceeding $1,000.

- For all supply costs, provide computations for the way that applicants arrived at the specific number.

**Note:** PCORI considers computers, tablets, docking stations, mobile data and protection plans, laboratory and office furnishings, and software to be general office supplies that are not allowable as direct-cost charges. If these items are proposed as essential for performing the research project, the following must be provided in the Budget Justification:

- Detailed explanation of why purchasing these items is necessary to complete the proposed research project
- Statement verifying that the requested items are not currently available for the PI’s use
- Statement assuring that the items will be purchased in accordance with applicable cost principles

Items purchased under PCORI-funded projects are not to be used as incentives to recruit or retain graduate students or any other project personnel.

**D. Travel Costs**

- Travel may include any domestic or international travel by project personnel or consultants directly related to, and necessary for, the project and within the limits explained below. PCORI uses the Federal Travel Regulations guidelines for per diem and other reimbursements.

- Travel costs must be itemized per trip and described as either scientific travel or programmatic travel, as outlined below:
  - **Scientific travel** includes travel to present at conferences, symposiums, and similar events. Scientific travel is capped at $10,000 over the life of the project. This cap is inclusive of the prime and all subcontractor scientific travel costs.
  - **Programmatic travel** includes travel needed to conduct the project (e.g., focus groups, project team meetings, and data collection). PCORI closely reviews all travel costs for reasonableness.
    - Airline or rail costs cannot exceed the customary standard commercial fare (coach or equivalent), or the lowest commercial discount fare. PCORI will not compensate upgrades.

- For each travel category (scientific and programmatic), include the number of trips and a brief description of the trips, including the number of people traveling and dates or duration of the stays.
• In the Budget Justification template, applicants must provide additional detail to explain the basis for the costs listed and describe how the travel is directly related to the proposed research project and necessary for achieving programmatic objectives.

E. Other Expenses

• Indicate and include general categories such as printing, publication, illustration costs, and non-consulting service contracts (when applicable).
• Use this section to include direct costs that cannot be accounted for in other budget categories. For example, these costs may include computer core services, data warehousing, or participant incentives.
• In the space provided, include a detailed explanation for items that exceed $1,000. Applicants must provide additional detail in the Budget Justification for each of these costs.

F. Equipment Costs

• Equipment costs include tangible items that have a per-unit cost of $5,000 or more and a useful life greater than one year.
• You must include up to three quotes for each item of proposed equipment with the Budget Justification.
• Costs must be reasonable and necessary for the project.

Note: Title to equipment vests with the recipient organization. PCORI, at its discretion, may require applicants to share or transfer equipment to other PCORI-funded projects within the recipient organization. PCORI must approve equipment disposition.

G. Subcontractor Costs

• This category includes all consortium and contractual costs. The prime awardee must issue a subcontract agreement to a collaborator if the criteria listed below are met:
  o The subcontractor personnel’s effort on the project is calculated as part of his or her “professional time” for his or her employer organization.
  o The subcontractor will be using significant resources (e.g., office space, supplies, computer, and personnel) at his or her own organization when working on the PCORI-funded project.
• State in the Budget Justification why each subcontractor was selected. Provide detail on their specific role and the aim or deliverable they will be supporting on the project.
• Subcontractors must adhere to all PCORI budget guidelines, including allowable and unallowable costs.

H. Indirect Costs

• PCORI limits the total indirect costs to 40 percent of personnel, consultant costs, travel, supplies, and other expenses and on the first $25,000 of each subcontract.
• Applicants who do not have a federally negotiated or independently audited indirect cost rate may assess up to 10 percent indirect costs, to be noted in the Budget Justification.
• Foreign applicants are eligible for no more than 10 percent indirect costs.
• A copy of the prime applicant’s federally negotiated or independently audited indirect cost rate letter must be submitted with the application. Include these copies in a single file with the Budget Justification.
• While consortium indirect costs must be noted in the prime applicant’s direct cost budget, consortium indirect costs are not included in the applicant’s direct cost budget cap.

I. Engagement Costs

• The budget should account for patient and other stakeholder partner (individual and organizational) compensation. For additional guidance, please review PCORI’s Compensation Framework.
• Awardees should also consider costs of patient and other stakeholder expenses, project staff, engagement event and/or meeting costs, and incorporating partner feedback. For additional guidance, please review PCORI’s Budgeting for Engagement Activities document.

Detailed Peer-Review Budget for Peer-Review-Related Costs

The detailed Peer-Review Budget must include costs related to the Peer-Review Process. Note that the Total Budget will include the Peer-Review Budget and the Research Project Budget when determining compliance with the Maximum Project Budget in the PFA.

• Costs associated with the Peer-Review Process are limited to personnel, consultants, and subcontractors.
• A Budget Justification must be included for the Peer-Review Budget.
• The Budget Summary must include the Peer-Review Budget.
• The PI has full discretion in identifying peer-review support personnel.
• The PI must dedicate measurable effort in support of the Peer-Review Process.
• Applicants must identify the peer-review support staff role within the budget at the time of submission.

Budget Summary for Entire Project

A Budget Summary for the entire project for the prime applicant is created within PCORI Online when the budget is entered into the system. Please review this information prior to submission. See Appendix 2: Allowable and Unallowable Costs to review acceptable and unacceptable uses of PCORI funding.

Budget Justification

Complete a Budget Justification Template for the prime applicant and each subcontracted organization
for the entire Research Project Budget and Peer-Review Budget for all research and peer-review-related costs. Provide sufficient detail to explain the basis for costs, the reason the costs are necessary to the project, and the reason for major cost variances. Include information about budgeting for engagement, including financial compensation of patient and other stakeholder partners, costs of patient and other stakeholder expenses, project staff, engagement event and/or meeting costs, and incorporating partner feedback. Please note that some projects employ or assign an individual responsible for coordinating or managing all project-related patient and other stakeholder engagement. This person should be listed as a Full-Time Equivalent under personnel, consultant, or subcontractor costs. Explain the basis for travel costs, and describe how the travel is related to the proposed research and necessary for achieving programmatic objectives.

Describe the specific role and tasks each research team member will perform and the impact on the Project Plan. PCORI will evaluate each member’s contribution as listed in the Budget Justification, to validate meaningful contributions and assess whether overlap in responsibilities occurs. Provide a clear distinction between individuals who should be key personnel and those who should be classified as “other” personnel.

Specify any other sources of funding, currently available or anticipated, to support the proposed research project. Include funding amounts and the period during which the funding will be available. Use continuation pages as needed.
In this component of the Research Plan (15 pages), applicants must describe their Research Strategy and work plan in detail and demonstrate how the proposed study responds to this PFA. This component also shows where merit reviewers may expect to find information to evaluate each of the merit review criteria delineated in the PFA. The Research Strategy addresses the following sections: (A) Specific Aims, (B) Background, (C) Significance, and (D) Study Design or Approach.

Per the PFA, applicants proposing to use an existing research network infrastructure (e.g., the National Patient-Centered Clinical Research Network [PCORnet]), research consortia, and/or related data resources (e.g., EMR data from health care delivery systems or administrative claims data from public or commercial insurers) should address this with sufficient specificity in the research plan, as appropriate. Applicants should also refer to the PCORI Methodology Standards for Data Networks as Research-Facilitating Structures.

Applicants are required to complete the PCORI Methodology Standards Checklist and upload it as a single PDF with the Research Plan Template to PCORI Online. Applicants must complete column D of the Checklist, using the drop-down menu options thereby indicating whether or not each methodology standard applies to their proposed research. Applicants must complete the subsequent columns, as appropriate, following the instructions in the Checklist. If the standard applies, in column E, provide the page number and section of your research plan where the text illustrates how you addressed the standard. Lastly, in column F, indicate whether your study may deviate from the standard and provide a rationale. Refer to the PCORI Methodology Report for explanations about the standards.

Adherence to PCORI Methodology Standards

Applicants are required to adhere to PCORI Methodology Standards and accepted best practices. PCORI Methodology Standards include 54 individual standards that fall into 13 categories. The first five categories are cross-cutting and relevant to most patient-centered outcomes research (PCOR) studies. Researchers must refer to all of these standards when planning and conducting their research projects. These five categories are:

- Standards for Formulating Research Questions
- Standards Associated with Patient-Centeredness
- Standards on Data Integrity and Rigorous Analyses
- Standards for Preventing and Handling Missing Data
- Standards for Heterogeneity of Treatment Effect

In addition to these five sets of standards, the first standard of “Standards for Causal Inference Methods (CI-1)” is cross-cutting and applicable to all PCOR studies.

The eight other standards categories will be applicable to certain study designs and methods. The standards in each of these categories must be used for guidance when they are relevant to a study. These eight categories are:

---

• Standards for Data Registries
• Standards for Data Networks as Research-Facilitating Infrastructures
• Standards for Causal Inference Methods
• Standards for Adaptive and Bayesian Trial Designs
• Standards for Studies of Medical Tests
• Standards for Systematic Reviews
• Standards on Research Designs Using Clusters
• Standards for Studies of Complex Interventions

These standards should be considered minimal. Additional best practices, including guidelines for conducting clinical trials developed by other organizations, must be addressed in the application.

All applicants must specifically discuss their capacity to measure such factors as differential adherence to chosen treatments (or participation in intervention programs) that could result in differences in the effectiveness of the alternative interventions being compared in clinical populations.

As instructed in the Research Plan Template, complete the PCORI Methodology Standards Checklist summarizing adherence to the relevant PCORI Methodology Standards. Do not address standards that are not applicable to your study.

PCORI program staff will review relevant standards and plans for adherence with the research team during the contract negotiation phase for applications that are awarded funding.

Within the Study Design or Approach (section D) applicants must outline how patients and other stakeholders will participate as partners in various phases of the proposed research. Before completing this section of the Research Strategy, applicants are encouraged to review PCORI’s Engagement Rubric, which can be found in the PCORI Funding Opportunities. Additionally, the Engagement in Health Research Literature Explorer, a searchable, catalogued resource for peer-reviewed literature, can help identify publications about engagement that are specifically relevant to your work. These resources are not intended to be comprehensive or prescriptive; instead, they provide a variety of options to incorporate engagement, where relevant, into the research process. Applicants should also review the PCORI Methodology Standards Associated with Patient-Centeredness and PCORI’s Sample Engagement Plans.

Applicants are expected to consult with patients and other stakeholders on their decisional dilemma and evidence needs, or to reference previously documented decisional dilemmas in preparation for the submission of LOIs and applications. To describe the decisional dilemma, state the specific clinical decision(s) or treatment choice(s) confronted by the decision makers and explain how the findings from the proposed research will inform those decisions. State why this decision—such as choosing a specific

---

15 Available at http://www.pcori.org/literature/engagement-literature
medication, surgical approach, or care delivery strategy to treat a condition or manage a specific population—is important to patients. Document the uncertainty patients and other stakeholders face in making this decision. Identify the patients and other stakeholders you consulted in determining that the proposed study addresses their evidentiary needs for decision making, and indicate your commitment to continue engaging them actively in the conduct of the study. Similarly, applicants should document how the project outcomes are especially relevant and meaningful endpoints to patients and other stakeholders.

For the Medication-Assisted Treatment PFA, applicants are not required to demonstrate that patients and other stakeholders are already engaged as research team members at the time an application is submitted. However, the Engagement Plan should outline how patients and other stakeholders will participate as partners in various phases of the proposed research, once awarded. Applicants should describe their plan to form a Study Advisory Committee (SAC), or other appropriate engagement body, to ensure that a broad spectrum of patients and other stakeholders advise and assist the research team with refining the study questions, outcomes, and protocols. These patients and other stakeholders must include national or regional organizations that represent, at a minimum, patients, caregivers, clinicians, policy makers, and other healthcare system stakeholders. Additional representation may be recommended in collaboration with PCORI, including individual patients with lived experience and other relevant stakeholders, such as scientific and methodological experts. The SAC, or other appropriate engagement body, should meet in person at least two times per year, and the budget should account for these engagement costs.

PCORI understands that engagement structures and approaches vary widely. Other engagement approaches, such as forming stakeholder groups, panels, task forces, working groups, and other bodies or involving individual patient and other stakeholder partners in various ways, are also permissible to employ—either in addition to or instead of the formation of the SAC. For clarification in your application materials and merit review purposes, please indicate which body or structure is filling the SAC requirements, including the requirements for in-person meetings at least two times per year, and appropriate budgeting. Please note specific requirements for this section in each PFA.

**Justification of Assumptions**

PCORI specifically seeks studies that are powered to detect meaningful effects. Applicants must justify the proposed sample sizes by explaining the assumptions used in all study power calculations. For example, the application must state all the necessary assumptions, such as the outcome(s) on which the power calculations are based, the estimated difference in the effect size between study arms, the standard deviation of the effect size measure, the type I and II error rates, and any other assumptions. All such estimates must be justified by referring to prior published research or preliminary data.

**Research Team and Environment**

While completing the Research Team and Environment component (two pages), applicants must describe the research team’s capabilities to accomplish the goals of the proposed research project and the appropriateness of the research environment to conduct the study. Applicants must also describe:

- How and why those research sites were selected
• How they tie back to the research project
• The resources, facilities, support, and collaborations available to ensure the project’s success
• If multiple sites are involved, prior experience that demonstrates the likelihood of working together successfully (e.g., past data sharing, IRB reciprocity, or other factors) to facilitate efficient conduct of the study
• Ways in which the project will benefit from the research environment’s unique features or from community involvement
• How sites will work together to ensure that milestones will be achieved
• Institutional and community investment in the success of the research, such as the availability of organized peer groups
• Logistical support, such as administrative management and oversight, and best practices training
• Financial support, such as protected time for research with salary support
• Access to and support of patient groups

Provide all key personnel professional and partner profiles/biosketches and detailed site descriptions within the People and Places Template as a separate PDF upload.

Dissemination and Implementation Potential

In this component (up to 2 pages), applicants should describe (A) their plans for making results available to study participants (as applicable) and (B) possible barriers to disseminating and implementing their work in other settings and any other study limitations that could have an impact on the usability of findings (e.g., propriety issues, applicability, scalability, and appropriate settings of care).

Beyond making results available to study participants (as applicable), PCORI does not expect awardees to budget for dissemination and implementation work at this juncture. For projects that produce important findings, PCORI will consider subsequent applications for funding to support dissemination and implementation efforts through separate PFAs and other mechanisms.

Note: Researchers are encouraged to submit documentation of any implementation agreement with the sponsoring organization confirming that the organization will implement successful interventions on a large scale. This agreement will be viewed as a positive factor during merit review. Include this with the Letters of Support PDF document as the last item.

Protection of Human Subjects

In this component (up to five pages), describe the protection of human subjects involved in your research. PCORI follows the Federal Policy for the Protection of Human Subjects (45 CFR part 46), including the Common Rule. For more detailed information, see Section 5, titled “Human Subjects Research Policy” from the Supplemental Grant Application Instructions for All Competing Applications.
All PCORI applications that involve interventions with human subjects must include a data and safety monitoring plan (DSMP). Depending on the anticipated level of risk associated with the proposed study intervention(s), different approaches and options, including a full external DSMB, may be required. The plan submitted by the applicants must provide justification of the proposed option in accordance with the expected risk to human subject research participants.

**Consortium Contractual Arrangements**

In this component (up to 10 pages), describe the proposed research projects that subcontracted organizations will perform. Explain the strengths that these partners bring to the overall project to ensure successful submission of contract deliverables in accordance with the milestone schedule.

Keep the following in mind as you complete this section:

- The prime applicant is responsible for the project and must adhere to the contract’s terms and conditions. The prime applicant must negotiate his or her subcontracts accordingly.
- Signed subcontract agreements are not required at the time of application submission to PCORI.
- Submitting an application to PCORI signifies that programmatic and administrative personnel from your organization and from all proposed subcontract organizations involved in the project are aware of your organization’s subcontract agreement policy and are prepared to establish the necessary interorganizational agreement(s) consistent with that policy.
- If applicable, subcontract personnel must be included under key personnel.
- Budget information for subcontracted organizations must be included in the Detailed Budget, Budget Summary for Entire Project, and Budget Justification.

**References Cited**

This component (up to 10 pages) is included in the Research Plan Template. Throughout the Research Plan, applicants must use in-text citations to reference published materials. In this section, list the full bibliographical citation for each reference. Each reference must include the names of all authors (in the same sequence in which they appear in the publication), the article title, and journal or book title, volume number, page numbers, and year of publication. Include only bibliographic citations. PCORI suggests including all references as in-text citations using AMA citation style, but other citation styles are accepted, when providing citations for source materials relied on in preparing any section of the application. Citations that are publicly available in a free, online format may include URLs or PubMed ID numbers along with the full reference. References must be limited to relevant and current literature. Be concise and select only those literature references pertinent to the proposed research, so that the 10-page limit is not exceeded. Websites must be referenced in the standard URL format (i.e.,

---

Appendix (Optional)

This component (up to 10 pages) is included in the Research Plan Template. Applicants may provide additional materials to support the proposed study (e.g., survey instruments and interview guides). Note that reviewers are not required to review this section during merit review.

People and Places Template

Professional Profile/Biosketch and Patient/Stakeholder Partner Biosketch

These components are included in the People and Places Template. Complete a profile/biosketch section (up to five pages per individual) for each person listed as key personnel (including PI, co-PI, dual-PI, co-investigator, consultant, or other significant contributors), copying the tables provided in this section as needed. Note that you may submit the most recently posted National Institutes of Health (NIH)-formatted biosketch in lieu of a PCORI-formatted biosketch. Patient and stakeholder partners serving as key personnel may choose to complete the Patient and Stakeholder Partner Profile/Biosketch form in lieu of the Professional Profile/Biosketch. At a minimum, each profile must include the person’s name, title, and degree(s). PCORI is especially interested to learn how each individual’s previous experience, past performance, and training in the field of PCOR have prepared him or her to conduct this research. The backgrounds, relevant experiences, and roles of patient and stakeholder partners must also be described.

Applicants must assemble a research team that is suited to complete the work. Applicants must demonstrate that the study team’s experience, leadership approach, governance, and organizational structure are appropriate for the project and will aid in achieving the project goals.

Project Performance Site(s) and Resources

This component (up to 15 pages) is included in the People and Places Template. Demonstrate in detail that the proposed facilities have the appropriate resources required to conduct the project as planned, within budget, and on time.

Applicants must provide a description of the facilities they will use during the project, including capacity, capability, characteristics, proximity, and extent of availability to the project.

Leadership Plan (required if proposing a dual-PI application)

Depending on the nature of the proposed study, a collaborative and multidisciplinary team may be required. PCORI permits applicants to name a maximum of two PIs within an application. The PIs may be from the same or different institutions. Each PI is accountable and responsible for the conduct of the award and for ensuring that all awarded milestones, deliverables, and reports are completed in accordance with the award terms and conditions.

If proposing a dual-PI application, one PI must be designated as the Contact PI. The Contact PI must be employed by the applicant institution and listed first within the application. Although PCORI will
recognize both PIs, the Contact PI is responsible for submitting the application and for communications between the PIs and PCORI, including coordinating meetings with PCORI staff.

Applicants must include a Leadership Plan (up to five pages) as the first section of the People and Places Template. The Leadership Plan must (1) describe the governance and organizational structure of the leadership team and the research project; (2) delineate the administrative, technical, scientific, and engagement responsibilities for each PI and the rationale for submitting a dual-PI application; (3) discuss communication plans and the process for making decisions on scientific and engagement direction; and (4) describe the procedure for resolving conflicts.

Note: Only the Contact PI may submit the application to PCORI.

Letters of Support

Save all Letters of Support as a single PDF file and upload it to PCORI Online, using the Letters of Support Table as the first page of the file. Follow the guidance below and in the table template to enable easy reference for merit reviewers and PCORI staff. Reviewers are asked to consider the Letters of Support as outlined in the template and in this guidance. Failure to assemble the letters properly may result in the reviewers missing key information. If this occurs, PCORI will not send the application for re-review because it will be deemed an error in application assembly, not an error in review.

All Letters of Support must be addressed to the PI and demonstrate the commitment of key personnel and supporting organizations (e.g., dual-PI, co-PI, co-investigators, consultants, patient and stakeholder partners, and stakeholder organizations) to the proposed project. Letters of Support are not required for personnel who are not contributing in a substantive, measurable way to the project’s scientific development or execution. Letters of Support must reflect clearly the involvement and material contribution to be provided by the signatory parties and are meant to confirm the commitment of collaboration.

Applicants proposing to use an existing research network infrastructure, research consortia, and/or related data resources must provide documentation supporting the involvement of network leadership throughout the study by submitting Letters of Support, which can be obtained from the Coordinating Center by submitting a request via the PCORnet Front Door. Please note that this takes approximately two weeks after submission.

PCORI may contact any individuals or organizations included in the Letters of Support with questions or to confirm support as described in the letters.

Letters of Support must be organized as follows:

- **Letters of Organizational Support:** Provide a letter (or letters, if applicable), signed by the Department Chair or appropriate organizational official, which confirms the institutional support of the proposed project, space to conduct the research, equipment, and other resources available for the project, including staff. PCORI also strongly encourages you to provide a letter from the department or organization leadership affirming support to disseminate research findings that are appropriate and warranted for implementation.
• **Letters of Collaboration:** Provide a signed letter from each collaborating individual or organization that will demonstrate that the PI has the support or resources necessary for the proposed work. Letters of Support from patient and stakeholder partners must describe clearly the origin of the study topic and the role of the partners in defining the question, comparators, goals and outcomes, and so on. Also, strongly encouraged are letters from patient or stakeholder partners or partnering organizations affirming support to disseminate and implement research findings that are germane and warranted for implementation. Include a Letter of Support for each consultant verifying the work to be performed and the negotiated rate.

• **Letters Confirming Access to Patient Populations, Data Sets, or Additional Resources:** If the proposed Research Plan involves access to patient populations, data sets, or additional resources, include a Letter of Support that confirms such access, signed by the person with approval authority. If access cannot be confirmed at the time of contract negotiation, PCORI reserves the right to withhold funding until the PI has demonstrated support for and access to the relevant population(s) and/or resources.

List all letters on the table (adding rows as needed), and include the page number on which each letter can be found in the single PDF file.

**Resubmission Letter**

An applicant may resubmit an application that was not funded and that completed PCORI’s merit review process (i.e., the applicant received a summary statement). See the Resubmission Policy for more information.

Resubmitted applications require completion and submission of a two-page Resubmission Letter. The Resubmission Letter provides an opportunity for applicants to give a high-level overview of how the application has been strengthened in its scientific merit and responsiveness to the current PFA. Simply responding to previous reviewers’ concerns is not sufficient; the application must be programmatical responsive and demonstrate methodological rigor and patient-centeredness. The Resubmission Letter will inform the merit reviewers’ understanding of the ways in which the applicant has made efforts to strengthen the application, and reviewers will evaluate the application based on its responsiveness to the PFA and the merit review criteria.

Applicants who previously submitted a dual-PI application and are now proposing a single-PI application, or who wish to make a change in the previous PI team, must address the rationale for the change within the Resubmission Letter.

PCORI evaluates all applications using the same merit review criteria found in the program-specific PFA.

**VI. Additional Requirements**

Awardees are required to comply with the following requirements:
Required Education of Key Personnel on the Protection of Human Subject Participants

PCORI requires all applicants to adhere to the NIH policy on education in the protection of human subject participants in the conduct of research. This applies to all individuals listed as key personnel in the application. The policy and FAQs are available on the NIH [website](http://www.grants.nih.gov/grants/guide/notice-files/NOT-OD-00-039.html).  

PCORI Public Access Policy

PCORI requires all awardees to adhere strictly to PCORI’s publication policies, which will be shared with awardees within the research contract.

Registering Clinical Trials

PIs are required to use the naming convention “PCORI-PCORI application number” (i.e., PCORI-XXXX-XXXXX). Clinical trials must be registered before enrollment of the first patient. All trials that meet the definition on the NIH [database](https://prsinfo.clinicaltrials.gov) (see “Data Element Definitions”) are required to register, if funded.

Funded clinical trials or observational outcomes studies must be registered at ClinicalTrials.gov.

Funded evidence-synthesis studies must be registered at PROSPERO. Funded patient registries must be registered at [https://patientregistry.ahrq.gov/](https://patientregistry.ahrq.gov/).

Standards for Privacy of Individually Identifiable Health Information

On August 14, 2002, the Department of HHS issued a final modification to the Standards for Privacy of Individually Identifiable Health Information, the “Privacy Rule.” The Privacy Rule is a federal regulation under the Health Insurance Portability and Accountability Act (HIPAA) of 1996 that governs the protection of individually identifiable health information and is administered and enforced by the Department of HHS Office for Civil Rights.

Decisions about the applicability and implementation of the Privacy Rule reside with the researcher and his or her institution. The [Office for Civil Rights](https://www.hhs.gov/ocr/) provides information on the Privacy Rule, including a complete Regulation Text and a set of decision tools on “Am I a covered entity?” Information on the impact of the HIPAA Privacy Rule on NIH processes involving the review, funding, and progress monitoring of grants, cooperative agreements, and research contracts is available at NIH.

Award Funding Conditions

At any time during the contract, PCORI reserves the right to discontinue funding for awardees who fail to meet the mutually-agreed-upon milestones. Applicants’ proposed milestones will be finalized in contract negotiations and prior to execution. See PCORI’s [Standard Contract Template](http://grants.nih.gov/grants/guide/notice-files/NOT-OD-03-025.html) for more information.

---

19 Available at https://prsinfo.clinicaltrials.gov/.
20 Available at http://www.crd.york.ac.uk/prospero/.
21 Available at http://www.hhs.gov/ocr/.
Co-Funding

PCORI partners with various other research organizations to leverage additional funds for some of its programs. If you currently have a funded project and would like to seek PCORI funding to add a new aim to the study that advances PCORI funding objectives, you may submit an application. We recommend that you speak with a Program Officer in advance.

Note: PCORI will not fund a project that is already funded through another funding entity. By submitting the application to PCORI, the AO is certifying that no overlap in funding exists at the time of submission. Prior to receiving a PCORI contract, awardees must disclose all current and pending support.

Dissemination and Data Sharing

PCORI is committed to publishing and disseminating all information and materials developed using PCORI funding, in accordance with its authorizing legislation. All recipients of PCORI contracts must agree to these principles and take steps to facilitate data availability.
Appendix 1: Example Milestones

Milestones are significant events, deliverables, tasks, or outcomes that occur over the course of each project signifying study progress. The completion of each milestone is intended to mark progress toward the project goals and ensure that the project is on schedule and likely to be completed successfully within the contract period.

As part of Merit Review Criterion 3, reviewers evaluate the submitted milestone schedule to assess the feasibility of the study plan.

In general, and at the discretion of your PCORI project team if awarded, the following are examples of milestones and deliverables to be submitted to PCORI. You may reference this list as you complete this section of your application:

**Required:**

- Awardees must submit a PCORI Progress Report in PCORI Online at least every six months

**Within first 6-9 months of an executed contract:**

- Develop, finalize, and submit copy of study protocol in accordance with the PCORI Methodology Standards.
- Submit IRB approval in PCORI Online (continuing approval submitted annually)
- Select and register project at appropriate site for the study design (ClinicalTrials.gov, RoPR, or other as approved by PCORI before study start date).
- Submit updated Recruitment Plan
  
  - Elements in the recruitment plan should, at a minimum, include the following: Timeline; total target sample size for primary analysis; name and # study sites; historical patient volume and estimated eligible N across study sites; estimated yield/consent; estimated lost to follow up/attrition; and estimated monthly enrollment.
- Submit updated Engagement Plan
  
  - Elements of the updated Engagement Plan should include: Updated roster of committee/panel members with short bios; Patient and/or Stakeholder Advisory Panel(s) or Committee(s) Governance Schematic; planned training for patients and other stakeholder partners on the research process; proposed meeting schedule; tasks or opportunities wherein patients and/or stakeholders will have input via consultation, collaboration or leadership; and efforts to evaluate/assess engagement.
- Begin recruitment: Site(s) activated and screening for study enrollment.
- Enroll first patient: From this point forward, submit monthly enrollment update to PCORI to include cumulative and interval recruitment, accrual, and retention for the overall study (e.g. number eligible/approached/consented/enrolled, retained).
  
  - Monthly enrollment updates are not required in the milestones schedules, but Awardee must include milestones to enroll and retain 25/50/75/100% of targeted sample size (include target N of patients per reporting period) throughout the duration of their project.
Within the first 12-15 months of an executed contract:

- 100% of the IRB approvals across sites submitted to PCORI
- Status report detailing executed subcontract agreements across sites
- 75% of the sites started recruiting patients
- 25% cumulative enrollment target has been met
- Programmatic Evaluation Materials Due to PCORI: For projects with a duration of 4+ years, Awardee must submit document that demonstrates study progress and feasibility based on metrics provided by PCORI at the time that a contract is executed. In general, the Programmatic Evaluation will encompass the first 12-15 months of the contract, with materials due to PCORI ~15 months.

Remainder of Contract:

- Primary Completion Date
  - An estimated Primary Completion Date must be provided when registering the study in ClinicalTrials.gov. For studies that are not clinical trials or non-prospective observational studies registered on ClinicalTrials.gov, the Awardee and PCORI shall agree on a Primary Completion Date as a milestone that precedes the agreed-upon date to submit a Draft Final Research Report.
- Results submitted to ClinicalTrials.gov or applicable database
  - Awardee ensures results are submitted to ClinicalTrials.gov or other database. For ClinicalTrials.gov, the generated tables are a required section in the Draft Final Research Report. Results must be submitted to ClinicalTrials.gov no later than submission of the Draft Final Research Report.
- Draft Final Research Report Submission
- Draft Final Research Report Revisions
  - Upon receipt of written summary, and as applicable, PI will make revisions and submit revised Draft Final Research Report and disposition of comments table for acceptance in accordance to PCORI policy and process.
- Final Progress Report Submission
- Approval/sign off of the Lay Abstract
  - No later than 90 days beyond the date PCORI accepts the final report

If awarded, a contractual milestone schedule will be negotiated and finalized with the PCORI project team. Additional reporting, such as monthly enrollment updates, may be required.
Appendix 2: Allowable and Unallowable Costs

Acceptable uses of PCORI research contract funds are those that directly support the proposed research project, including collecting and analyzing data and obtaining relevant data sets. Because PCORI primarily funds comparative clinical effectiveness research, the research projects generally involve the comparison of clinical interventions or strategies that are considered to be accepted standards of care and are not experimental or investigational. As a result, when developing proposed Detailed Budgets, it is important for funding applicants to think carefully about which costs derive from, and directly support, the research project, as opposed to those costs that would otherwise be incurred in the course of providing the clinical care and health-related costs around which the research project is organized.

Allowable costs (i.e., those costs that can be included in a proposed Detailed Budget when applying for a PCORI Funding Award and charged to the award) may include the following costs that derive from and directly support the research project:

- Salaries and fringe benefits for study investigators and other research project staff (including engaged patient and stakeholder research study partners) related to their percentages of effort on conducting the research project. (Such costs may not include personnel who deliver patient care as a component of their participation in the research project.)
- Consultant fees
- Travel for mandatory investigator meetings
- Travel that is necessary for conducting the research project
- Supplies
- Equipment
- Subcontracts
- Expenses related to conducting engagement activities with patients and other stakeholders
- Other direct research expenses
- Indirect costs

A funding applicant must specifically request costs related to conducting the research project through itemization on the Detailed Budget. PCORI will consider this request in the course of making an award. The following principles and requirements generally apply to PCORI’s evaluation of the proposed budget and determination of allowable costs and should guide applicants in preparing their Detailed Budgets:

- Typically, IRB fees are included in an organization’s indirect cost pool. However, PCORI will allow this expense as a direct cost if the costs are not included as part of the indirect cost rate. By submitting the application, the PI and AO certify that their institution treats IRB fees as direct costs, and the fee is allocable to the study. IRB fees are subject to audit.
- In general, PCORI will not cover costs for study interventions that constitute the procedures, treatments, interventions, or other standard clinical care (“patient care”) that is being proposed
for comparison in the research project ("patient care costs"). The host healthcare delivery system, third-party payer, product manufacturer, developer of the intervention, or other interested party must cover the patient care costs.

- The willingness of one or more stakeholder groups to cover patient care costs incurred during the research project, even when one of the comparators is not currently directly covered by insurance, will be taken as strong endorsement of the research project by the stakeholder group. Such commitments also provide an indication that the stakeholder groups will use the research study’s findings. (Such support by a stakeholder group must be discussed in the application.)

- Except for specific permission in exceptional circumstances, PCORI will not cover patient care costs.

- PCORI may consider coverage of the copayment or coinsurance costs of participating study subjects when necessary to preserve blinding in a study or to ensure access to the study for vulnerable populations.

- PCORI will generally cover costs for ancillary tasks directly related to the research project. Examples include costs for obtaining informed consent to participate in the research project; collecting data pursuant to the research protocol; or collecting and monitoring study subject data that would not normally be performed in the course of patients receiving the patient care being evaluated in the research project.

PCORI will review all proposed costs. Costs must be deemed allowable, allocable, and directly necessary for the successful execution of the proposed research project. A notification of pending award is subject to budgetary review and successful contract negotiation. The actual award amount may vary. For more information, please see PCORI Cost Principles.
PCORI considers computers, tablets, docking stations, mobile data and protection plans, laboratory and office furnishings, and software to be general office supplies that are not allowable as direct-cost charges.
Appendix 3: Administrative Actions

Applicants who fail to submit required documents or adhere to administrative requirements may be rejected from the merit review process. The chart below explains the reasons for rejection, modification, and appended requests.

<table>
<thead>
<tr>
<th>Automatic Rejection</th>
<th>Modification by PCORI</th>
<th>Appended upon PCORI’s Request*</th>
</tr>
</thead>
<tbody>
<tr>
<td>An application or LOI will be automatically rejected if any of the following apply:</td>
<td>PCORI will modify an application by removing all pages that exceed stated limits.</td>
<td>Unless automatically rejected or modified, PCORI may request that the applicant submit missing documents or correct noncompliant documents.</td>
</tr>
<tr>
<td>• Exceeds the specified period of performance outlined in the PFA</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Exceeds the maximum budget specified in the PFA</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Has adjusted margins or font size (LOI)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>• Does not include or has an incomplete Research Strategy</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*PCORI will not accept requested documents submitted more than one business day after initial request.
